

Stop Touching Things!

Citizen is proud to partner with South Seas Data, the creators of SIR (System Interface Replacement) management utility. SIR from South Seas Data allows complete management of workstations and applications without on-site human interaction.

Manage, Manipulate, Modify – All from remote locations with the SIR (A-I) Artificial Intelligence platform

- Full terminal management including updates, upgrades, and lockdown.
- No “in person” requirement to troubleshoot and administrate.
- Monitoring peripheral and connected devices.
- Retail, Healthcare, or ANY environment where workstations are present and IT professionals may not be.

Safely, securely, and efficiently. Call and ask us how we can help you!

South Seas Data is a proud partner of *Citizen Systems America!*
